EDUCATION

SISTER NIVEDITA UNIVERSITY
2020-2024
Btech in Computer Science and Business Systems
Kolkata
CGPA : 9.28 / 10

UP PUBLIC SCHOOL
2018-2020
Class XII, CBSE
91.4 Percentage

ST. ANDREWS HIGH SCHOOL
2004-2018
Class X, WBBSE
86.4 Percentage

COURSEWORK

UNDERGRADUATE
Data Structures and Algorithms
Operating systems
Object Oriented Programming
Database Management System
Machine Learning

SKILLS

PROGRAMMING
Languages:
C • C++• Python • Javascript
Frontend:
HTML• CSS• React
Backend:
Nodejs • Express js •Redux • FastAPI • REST APIs • Webhooks
Database:
PL/SQL• MongoDb •Vector Databases
AI Tools:
LLMs • Prompt Engineering • SentenceTransformers •Twilio Voice API

EXPERIENCE

TATA CONSULTANCY SERVICES | Systems Engineer (Prime)
Jan 2025 – Present | Kolkata, India

- Developed an OCR-based microservice to automate document verification by extracting and validating key financial details.
- Trained an ML model to predict insurance reserve amounts based on claim data and integrated it into backend workflows.
- Designed Java APIs for MoneyApp (a mobile banking platform) to enable claim logging and tracking, ensuring seamless integration with the existing core system.
- Worked extensively on PL/SQL procedures for backend processing, with minor JSP updates for validations and feature support.
- Implemented policy-level latitude–longitude mapping to recommend the nearest service providers for claims.
- Contributed to SRP (Special Risk Protection) product modules, including premium calculation and claim processing.

PROJECTS

VOXAAI| Github
- Built an AI-powered voice-based customer support system using Twilio and FastAPI.
- Implemented intent-based routing between database workflows and LLM + RAG.
- Designed a FAISS-based vector retrieval pipeline using SentenceTransformers.
- Enabled multi-turn conversational memory using MongoDB.

MOTIONPRINT | Github
- Developed an identification system to uniquely recognize individuals based on their walking patterns.
- Collected accelerometer and gyroscope data from smartphones to analyze gait dynamics.
- Trained an LSTM-based deep learning model to learn temporal gait patterns and improve identification accuracy

ACHIEVEMENTS

.
- Amazon ML Summer School invitee, excelling in ML studies
- 950+ problems solved in **Leetcode**
- Global rank 81 in October challenge 2021 in DIV3 (Codechef)
- Top 13 percent at Leetcode (Highest rating 1671)
- Completed Hacktober-Fest 2021 sponsored by digital and Contributed to 4 of their open source projects

POSITION OF RESPONSIBILITY

.
- Technical Lead at HackClub SNU (2022)
- Problem Setter and Tester executive at Codechef SNU Chapter (2021)
